

Chemical storage tanks

- Fabricated chemical storage tanks suitable for a compressive range of chemicals at both low and high temperatures.
- Specially fabricated from Polypropylene or PVC, depending on the chemicals to be stored.
- A bespoke Service providing tanks of most length, width and height configurations to store chemicals safely.
- Simply provide your requirements and we will provide a competitive quotation.
- Our in-house manufacturing capability allows us to provide the most cost effective bespoke fabricated chemical storage tanks available.

We can also manufacture ancillary items to suit chemical tanks such as:

- Filter basket
- Mobile tank and trolley

Please contact us if there are any other chemical tank related items you require.
